📍 Lahore

Final-year BSCS student, pursuing my degree from UET, Lahore driven by a passion for using technology to tackle real-life issues. Skilled in software development and problem-solving, with a keen interest in innovation. Excited to make a meaningful impact in the tech field.

Professional Experience

Front-End development Internee

Oct 2021 - May 2023

- Front-End Development Intern: I completed an internship at PAKINTERN as a front-end developer and successfully created a project in MERN, achieving a 30% improvement in website loading speed through optimized code implementation..

General Member at GDSC

May 2022

- Contributed to projects and workshops, increasing project completion rates by 15%. Actively participated in seminars on emerging technologies, driving a 10% improvement in project efficiency.

Projects

Ambulance Services [↗](#)

- Designed a desktop application by implementing concepts of DSA(stack, Queue and all major algo's).
- Main feature of this app is to schedule n dispatch ambulances.

FYP Evaluation [↗](#)

- Developed in SQL programming and using Database concepts i.e Normalization, Data Modeling.
- This Project has features to allocate supervisor to group and manage their assignment and evaluation.

HyperMart [↗](#)

- Create a Project based on OOP concepts .
- This project has features that deal with Admin and Manager operations in HyperMart.
